

ACMA mandated EMC standards

The Australian Communications and Media Authority (ACMA) incorporates the listed standard(s) as mandatory standards under section 162 of the *Radiocommunications Act 1992* as part of the ACMA's Electromagnetic Compatibility (EMC) Regulatory Arrangement.

Suppliers must select an appropriate standard in column 2 of Part 2 of the table below as an applicable standard for a device. If none of the standards listed in Part 2 apply to a device then a generic standard from column 2 of Part 1 becomes the applicable standard for that device. The ACMA only mandates performance requirements in relation to emissions therefore compliance to standards within this list is only required to the extent that matters within the standard that relate to interference to: (a) radiocommunications; and, (b) any uses or functions of devices.

Important notes:

Note 1: The expiry date of a standard refers to the date the ACMA no longer recognises the standard as an applicable standard for a particular device. Unless stated otherwise, for Standards Australia standards, the expiry date of these standards occurs 2 years after its replacement standard is published. For example, when an existing standard is superseded by a newer version, the existing standard will continue to be recognised as an applicable standard for a further 2 years after the publication date of the newer standard. After 2 years however, only the newer version of the standard is recognised. Suppliers should refer to Standards Australia website for relevant publication dates.

- The Standards Australia website is available [here](#).

Note 2: For EN, CISPR and IEC standards, unless stated otherwise, the expiry date of a standard is taken to be the expiry date published in the Official Journal of the European Union (OJEU).

- The Official Journal of the European Union is available [here](#).

Note 3: The applicable standard listed in column 2 is modified by any relevant notes listed in Column 10 of the table.

Note 4: In this version of the table some original columns have been removed as the information was not pertinent. Original column numbers have been retained to align the table with the *Radiocommunications (Electromagnetic Compatibility) Standard 2008*.

Note 5: *For any standard listed with an AC, the ACMA will accept the test report with or without the AC as these are editorial changes

ACMA mandated EMC standards

Part 1 Generic standards							
1	2	3	4	7	8	9	10
Item No.	Applicable Standard	Full Title of Standard	Publication Date	Brief description of equipment type	Standard being replaced	Expiry Date of replaced standard	Remarks
G1	AS/NZS 61000.6.3: 2012	Electromagnetic compatibility (EMC) – Part 6.3: Generic standards – Emission standard for residential, commercial and light-industrial environments	30/04/2012	Equipment intended for use in a residential, commercial, or light industrial environment that is not covered by one of the product family standards			Harmonics and flicker not required

52	EN 61326-1:2013	Electrical equipment for measurement, control and laboratory use - EMC requirements - Part 1: General requirements	2013	Electrical equipment for measurement, control and laboratory use			
	IEC 61326-1 Ed 2.0		10/07/2012				
53	EN 61543:1995 +all amendments up to and including A2:2006	Residual current-operated protective devices (RCDs) for	2006	Residual current-operated protective devices (RCDs)			

ACMA mandated EMC standards

Part 2 – Product Family and Equipment Standards							
1	2	3	4	7	8	9	10
Serial	Applicable Standard	Title of Standard	Publication Date	Brief description of equipment to which standard should apply	Standard being replaced	Expiry Date of replaced standard	Remarks
	IEC 61543:1995 + A1:2004 + A2:2005	household and similar use - Electromagnetic compatibility	1995	for household and similar use			
54	EN 61800-3:2004 +A1:2012	Adjustable speed electrical power drive systems - Part 3: EMC requirements and specific test methods	2012	Adjustable speed electrical power drive systems			
	IEC 61800- 3:2004+A1:2011		2011				
55	EN 61812-1:2011	Specified time relays for industrial use - Part 1: Requirements and tests	01/08/2011	Specified time relays for industrial use			
	IEC 61812-1 (Ed.2) :2011		2011				
56	EN 300 386 v1.6.1	Electromagnetic compatibility and Radio spectrum Matters (ERM); Telecommunication network equipment; Electromagnetic Compatibility (EMC) requirements		Telecommunication network equipment			
57	ISO 13766:2006	Earthmoving Machinery – Electromagnetic compatibility	2006	Agricultural and forestry machinery			
58	ISO 14982:1998	Agricultural and forestry machinery – Electromagnetic compatibility – Test methods and acceptance criteria	1998	Agricultural and forestry machinery			

ACMA mandated EMC standards

Part 2 – Product Family and Equipment Standards							
1	2	3	4	7	8	9	10
Serial	Applicable Standard	Title of Standard	Publication Date	Brief description of equipment to which standard should apply	Standard being replaced	Expiry Date of replaced standard	Remarks
59	EN 50561-1:2013	Power Line Communication Apparatus Used In Low-Voltage Installations - Radio Disturbance Characteristics - Limits And Methods Of Measurement - Part 1: Apparatus For In-Home Use	2013	In-home powerline telecommunications equipment
