

The media today is a joke. Where is the balance and the journalism ? Media is only interested in a headline and getting some ratings. The ABC has a charter and since when have they been held accountable for their unbalanced reporting.

Other commercial channels are just as bad. Where is the fact checking that used to go on.

We should do what they do in Japan which has NHK which is a public broadcaster and also has a charter similar to ABC. They are required to report the news not make it. If they are biased then everyone in the whole organization is sacked. Game over.

Media is just nuts. There is no factual reporting going on. Just being sensationalist to get a headline and some clicks online.

When is the GOVT going to hold them accountable

Enough is Enough
