**Subject:** Coverage on climate

Dear ACMA,

The news angle by News Corporation and Macquarie Media's radio commentator have been absolutely appalling in the way that they have covered Climate Change.

The reporting contravenes the spirit of the press to accurately cover information and relay it to the public.

This has occurred in the way that they have willfully misrepresented the facts on climate change.

Please refer to this image as proof as to what I mean. There has been no balanced reporting on this subject by these media players and false information often used to satisfy alternate motives.

Kind regards  
Matt Murfitt
