## FM Broadcasting Services Band in the Perth RA 1 License area

My main concern here is what is the ACMA doing in regard to future FM services in the Southwest region. Surely Perth has more than enough stations and the proposal here is for more FM services. There will be little FM space left for regional markets adjacent to Perth.

Commercial Radio services in the Southwest are terrible and only one of the three broadcasters is on FM. There is a total lack of competition and Bunbury needs a fourth commercial station, and on FM.
