

Australian Radiofrequency Spectrum Plan 2017 Decision under subsection 10(10)

Pursuant to subsection 10(10) of the *Australian Radiofrequency Spectrum Plan 2017*, I, Christopher Hose, delegate of the Australian Communications and Media Authority, being satisfied that the mobile-satellite service (specifically, earth stations in motion on land or on water communicating with non-geostationary space stations in the fixed-satellite service (Earth-to-space)) in the frequency ranges 28.5–29.1 GHz;

- (i) is an unspecified service in respect of the 28.5–29.1 GHz frequency band; and
- (ii) is unlikely to cause harmful interference to another service;

approve the 28.5–29.1 GHz frequency band for use by the mobile-satellite service (specifically, earth stations in motion on land or on water communicating with non-geostationary space stations in the fixed-satellite service (Earth-to-space)).

Dated: 19/10/2017
