**Subject:** Submission re: review of non-assigned amateur regulatory arrangements

Dear ACMA,

I am writing to 'have my say' re review of non-assigned amateur regulatory arrangements.

As a current holder of an armature radio license (VK2FMFC , I have put in an application for a new callsign as I have moved to VK1 land) I wish to emphatically express my preference for **option 1. : keep the existing apparatus licensing arrangements and conditions.**

I have not been a license holder for long, however in my short time (4 years) I have become a firm believer in the protection of the spectrum and having some section of the spectrum reserved for armature and experimental use for radio telecommunications.

I believe this is the best course of action for several reasons such as

- Provides some small funding to ACMA / Government for usage of spectrum
- Current arrangements WORK
- Reduced interference given use is tied to a license

I appreciate the hard work ACMA do for all spectrum users and hope that the current format remains in place for the benefit of everyone.

Regards
