My thoughts on this are that foundation licence holders have the power limited lifted to 50 watts, & have access to all HF Amateur bands, along with the current bands on UHF/VHF. Only restrictions should be no TV transmissions. 11m HF (CB band) use 4w/12w. My opinion is that 50 watts, or 100w, then 200 for standard holders. I believe this would be much better.
