Belconnen ACT 2616

Dear Sir or Madam

Regarding the ACMA proposal to introduce class licencing for the Australian Amateur Service I would like to submit the following:

That the ACMA continue to use the current system of apparatus licensing for the Australian amateur service.

I am a member of the WIA and I know that they are also making a submission in regard to this matter. This is so important to me that I am making this submission as an individual.

I believe the class licensing system is not suitable and would be detrimental to the ongoing nature of experimentation and self learning. I also believe the strong governance from the ACMA is beneficial to the service and should be continued.

Yours sincerely

Ian Cook – VK6DW
