Re: Response to the proposed changes to Amateur licensing arrangements
Non-assigned amateur stations February 2021. The ACMA invited comments
on the issues set out in the discussion paper "Proposed Changes to Amateur
Licensing arrangements"

The ACMA proposes three scenarios:-

Option A: keep existing apparatus licensing arrangements and conditions

Option B: simplify current licensing arrangements and conditions

Option C: transition non-assigned amateur stations to class licensing
arrangements

Option B is lacking in detail thus has not been considered as an option.
Option C completely disadvantages my current protections offered by the
radio communications act 1992 registered 2021.

Therefore I support Option A and reject Options B and C.

Signed yours truly,
