Proposed changes to radiocommunications equipment regulation November 2022

Thank you for the opportunity to comment on the paper listed above.

Profiles Resource Management (PRM) is Australia's premier wireless spectrum management service for live events in Australia. We have a broad clientele that cover most major sporting events, large concerts, music festival and cultural activities such as the Australia Day festivities on Sydney Harbour each year. It is not unusual for us to have an event with 300 or more wireless devices under management.

PRM supports the changes to the special event provisions. If implemented as outlined, these changes will assist our stakeholders at events we manage, making it easier for international users to import their own equipment for use at events.

Once again thank you for the opportunity to comment on this issue. We are happy to provide you with any further insights at anytime.
