

Proposed Amateur Radio Charges includes proposing a new set of charges for considering applications for call signs.

A Cost Recovery Implementation Statement must include:

The stakeholder engagement strategy, including a summary of the most recent consultation round - was consulted and when, what their views were, and how those views have been considered.

The CRIS does not include Amateur Radio call signs with the prefix VK, a single digit followed by a single letter. There has been no stakeholder consultation regarding this change to available call signs and how the views of Amateur Radio operators have been considered when these call signs are deleted/expire.

The Proposed Amateur Radio Charges section does not include changes related to the introduction high power operation. The changes to the charging regime have not considered the implementation costs to the users and is limited to the introduction of the new ACMA charge to the users. Consultation documentation has not included the hidden costs of this additional regulatory burden on the users.
