Charges under the Broadcasting (Charges) Determination 2017	65

1 Introduction

1.1 Purpose of this Cost Recovery Implementation Statement

In accordance with the Australian Government Charging Framework, the ACMA is required to cost recover for the regulatory services we provide. This includes the preparation and publication of a Cost Recovery Implementation Statement (CRIS) before charging can commence.

This CRIS provides information on how we implement cost recovery for our radiocommunications, telecommunications and broadcasting services. Appendix A of this CRIS outlines these charges, including any changes to existing charges.

The CRIS includes financial and non-financial information for our activities and contains financial forecasts over the 2025–26 and 3 forward years (to 2028–29) – see Table 6. We will maintain the CRIS until the activities or cost-recovery arrangements for the activities have been discontinued.

1.2 Background and description of the regulatory charging activity

The ACMA is a statutory authority within the Infrastructure, Transport, Regional Development, Communications and the Arts portfolio of the Australian Government. We are Australia's regulator for broadcasting, radiocommunications, telecommunications and interactive gambling, among other functions.

Our activities include:

- regulating telecommunications and broadcasting services, some internet content, interactive gambling and datacasting services
- managing access to spectrum and planning the availability of radiofrequency bands through licence arrangements, and resolving competing spectrum demands through price-based allocation methods, for the telecommunications and broadcasting sectors
- regulating compliance with the relevant legislation, licence conditions, codes of practice, standards, service guarantees and other safeguards
- upholding community safeguards and protections
- promoting and facilitating industry self-regulatory and co-regulatory solutions to emerging issues
- exercising powers, where necessary, to create legislative and other instruments, often in the form of standards or service provider rules
- providing information to Australians to promote informed decisions about communications products and services
- reporting on matters relating to the communications industry, including its performance
- representing Australia's communications interests internationally
- advising the government on specific matters from time to time.

The policy objective of recovering service costs is to ensure that those who require and use government services meet the costs of those activities. We have undertaken a comprehensive review of our existing activities to assess the ongoing requirement of each activity and the appropriateness of the current charges. The ACMA's hourly rates in this

CRIS have been used to set the new charge amounts. The review has been undertaken in the context of existing legislation that has established our powers to recover the costs of our activities and review the appropriateness of the current level and application of charges and our standard and special hourly rates. This is discussed further in Section 3 of this CRIS.

1.3 Stakeholders

Table 1 provides a list of relevant stakeholders for the ACMA's radiocommunications, telecommunications and broadcasting activities.

For the activities listed in Appendix A, these can be directly attributed to the benefit that the service user receives. Therefore, it is appropriate that the service user pays a charge for the service.

Table 1: Key stakeholders

Activity group	Type of service	Key stakeholders
Radiocommunications	Apparatus licences	Community, commercial and national broadcasters
		Individual licensees
		Government entities
		Commercial organisations (mining, construction, communications companies)
	Spectrum licences	Major network operators
		Government entities
		Television broadcasters
	Examinations	Marine radio operators
	Other services	Satellite operators
		Australian search and rescue service
		Commercial and community organisations
		Individuals
Telecommunications		Telecommunications carriers
		Telecommunications carriage service providers
Broadcasting		Commercial broadcasters
		Community broadcasters
		National broadcasters

2 Policy and statutory authority to cost recover

2.1 Government policy approval to charge

As an outcome of the former Department of Communications and the Arts' Portfolio Charging Review in the 2019–20 financial year and, more recently, the amendments made to the *Radiocommunications Act 1992* by the *Radiocommunications Legislation Amendment (Reform and Modernisation) Act 2020*, the Australian Government confirmed the appropriateness of the cost-recovery arrangements for the charging-related activities listed in Appendix A.

2.2 Statutory authority to impose cost-recovery charges

Under section 60 of the *Australian Communications and Media Authority Act 2005* (the ACMA Act), we may, by written instrument, make determinations fixing charges for services provided by us, and any matter in relation to which expenses are incurred by us under specified pieces of legislation. Specific provisions of the *Radiocommunications Act*, the *Telecommunications (Carrier Licence Charges) Act 1997* and the *Telecommunications (Numbering Charges) Act 1997* also empower us to impose charges under written instruments or set amounts for charges imposed by legislation.

Table 2: List of legal instruments outlining charges for service

Determination	Made under
Radiocommunications (Charges) Determination 2022 (the Radiocommunications Determination)	Subsection 60(1) of the ACMA Act
Radiocommunications (Digital Radio Multiplex Transmitter Licence – Application Fee) Determination 2022	Paragraphs 102C(2)(b) and 102D(2)(b) of the Radiocommunications Act
Telecommunications (Charges) Determination 2022 (the Telecommunications Determination)	Subsection 60(1) of the ACMA Act
Telecommunications (Carrier Licence Charges) (Application) Determination 2022	Subsection 9(1) of the <i>Telecommunications (Carrier Licence Charges) Act 1997</i>
Broadcasting (Charges) Determination 2017 (the Broadcasting Determination)	Subsection 60(1) of the ACMA Act
Telecommunications (Numbering Charges) (Allocation Charge) Determination 2025	Subsection 13(1) of the <i>Telecommunications (Numbering Charges) Act 1997</i>

Determination	Made under
Telecommunications (Annual Charge) Determination 2025	Subsections 20(1) and 22(2) of the <i>Telecommunications (Numbering Charges) Act 1997</i>
Telecommunications (Collection of Numbering Charges) Determination 2025	Subsections 468(3) and (4) of the <i>Telecommunications Act 1997</i>

3 Costs of performing ACMA activities

The costs incurred by the ACMA in executing our functions include direct, support and overhead costs.

Direct costs are those that can be directly attributed to our service provision. These include direct staff salaries and other expenses (for example, contractors, consultants, suppliers, office consumables and travel) that are incurred by the operational areas in carrying out the direct activities.

Support costs are those incurred by our support service areas, such as information technology, finance, human resources, facilities and legal. Support costs include all support staff salaries and other expenses (for example, contractors, consultants, suppliers, depreciation and occupancy) incurred by the relevant support areas.

Overhead costs are those incurred by the ACMA relating to depreciation and property operating expenses. Support and overheads costs are allocated to direct activities using appropriate cost drivers (that is, average staffing levels).

3.1 Hourly rates

3.1.1 Standard hourly rate

The ACMA's standard hourly rate has been reviewed to reflect its current costs (based on 2023–24 actual costs to the ACMA). As a result of the review, the rate has increased from \$226 to \$239 (an increase of approximately 6%).

The revised hourly rate of \$239 was established by dividing the ACMA's net cost of service by the total number of productive hours worked by staff providing direct services for the 2023–24 financial year. This includes attributing all support and overhead costs. The increase in costs was due mainly to an increase in staffing effort attributable to a number of new budget measures, the impact of the staff pay rise in 2024, the higher inflation impact on supplier costs and increased ICT costs as a result of the ACMA network refresh.

We have also undertaken a comprehensive review of our current activities to assess the requirements of each activity and the time taken by ACMA staff to complete these activities. The standard hourly rate has been consistently applied to all radiocommunications, telecommunications and broadcasting charges, except those related to radiocommunications field operations and interference investigations. The hourly rates are specified in section 9 of the Radiocommunications Determination, section 8 of the Telecommunications Determination and section 10 of the Broadcasting Determination.

Changes to additional or special ACMA hourly rates

- **Special hourly rate A – Radiocommunications field operations and interference investigations:** The special hourly rate A of \$254 (increased from \$241) has been applied to field operations and interference investigations. This increase reflects the change in the standard hourly rate from \$226 to \$239. This charge was established due to large operating costs, particularly fixed costs associated with operating vehicles fitted with technical equipment. See section 9 and items 7.2.3, 7.2.4 and 7.2.7 of Part 7 of Schedule 1 to the Radiocommunications Determination.

4 Cost recovery model

We are introducing a charge to enable us to charge, on a cost-recovery basis, for the assessment of applications for radiodetermination licences¹ to operate Radionavigation-satellite service (RNSS) repeater devices.

There are also changes to some of the existing charges relating to apparatus licences. This is in addition to the increase in the standard and special hourly rates. Further details are provided in section 5.1 and Appendix A of this CRIS.

4.1 Outputs and business processes of the activity

Our activities for radiocommunications, telecommunications and broadcasting services that are subject to charging arrangements are outlined in Appendix A, including:

- current and proposed charges
- relevant descriptions (current and proposed)
- explanations for the change.

In some cases, the description for a certain activity may have been amended to better reflect the service being provided. These changes are set out in Appendix A in the column headed 'New description' for comparison.

4.2 Design of cost-recovery charges

As part of the last ACMA-wide Portfolio Charging Review in 2019–20 and to validate and support the ACMA's charges, an activity-based costing (ABC) process was undertaken to identify and document the underlying business processes and staffing effort required to provide each service.

The business processes for each activity are reviewed annually as part of the annual fees for service CRIS process. The calculation of charges is based on the ACMA's hourly rate multiplied by the estimated time taken to conduct each activity. If the business processes and staffing effort are regular and consistent, a flat charge is applied across those activities. If it is irregular and/or inconsistent, a variable charge based on the actual time taken to deliver the service is applied.

The above methodology has been applied to all the charges outlined in Appendix A. Due to the above ABC process and update in the ACMA hourly rates, nearly all charges have increased. The individual breakdown with the current charge, new charge and the variance as a percentage, are shown in Appendix A.

4.3 Radiocommunications-related charges

Radiocommunications regulation, planning and licensing

The Radiocommunications Determination specifies the charges for a range of radiocommunications activities, which are grouped under the following output categories.

¹ A radiodetermination licence is a type of apparatus licence that authorises the operation of a radiocommunications device that uses radio waves to determine the position, velocity or other characteristics of an object.

Issue, transfer and renewal of radiocommunications licences

We issue 3 kinds of licence:

- apparatus
- spectrum
- class.

The Radiocommunications Determination includes charges for issuing, renewing or varying apparatus licences and certain charges associated with spectrum licences:

- **Apparatus licences:** apparatus licences are issued to authorise operating radiocommunications devices. The charges applicable to the activities involved in issuing, renewing or varying apparatus licences are outlined in Part 2 of Schedule 1, tables 1–2 of the Radiocommunications Determination (see Appendix A, ref 1–33). The types of services that may operate under the apparatus-licensing regime include mobile broadband, emergency services, amateur radio, satellite, broadcasting and land mobile. As licence applicants receive a direct benefit from the right to use radiocommunications devices, we consider these activities are appropriate to be subject to cost-recovery arrangements.
- **Spectrum licences:** spectrum licences are tradeable and technology-flexible (that is, the licence is not normally limited to any particular technology, system or service). They provide the right to use radiocommunications devices in specified spectrum within a defined geographical area. Spectrum licences are mainly allocated by auction, though they may also be allocated for a pre-determined price. We recover the cost of part of our spectrum management activities through the charges applicable to certain activities associated with spectrum licensing, as outlined in Part 5 of Schedule 1, Table 1 (5.1.1 and 5.1.2) of the Radiocommunications Determination (see Appendix A, ref 45–46).
- **Class licences:** class licences authorise operating radiocommunications devices where coordination of individual transmitters is not required to manage interference risks. Devices that are currently subject to class licensing in Australia include mobile phone handsets, cordless telephones, and a range of other low-power devices, such as wi-fi transmitters, garage door openers and wireless identification tags. Our class-licensing arrangements provide permission for each operator to operate the equipment without the need to obtain an individual licence. Accordingly, class licences are excluded from cost-recovery arrangements.

4.3.1 Charges relating to apparatus licences (see Schedule 1, Part 2, tables 1–2 of the Radiocommunications Determination and Appendix A, ref 1–33).

The charges in Part 2 of Schedule 1 to the Radiocommunications Determination are grouped into assigned apparatus licences, non-assigned apparatus licences and area-wide licences:

- **Assigned licences** (see Schedule 1, Part 2, tables 1–2 of the Radiocommunications Determination and Appendix A, ref 1–16 and 18–33).
An assigned apparatus licence is an apparatus licence that specifies the frequency on which, or frequency range within which, a radiocommunications device may operate, but does not include a category 1 digital radio multiplex transmitter licence, category 2 digital radio multiplex transmitter licence or a category 3 digital radio multiplex transmitter licence.
- **Assigned PTS licences** (see Schedule 1, Part 2, Table 1 (item 2.1.8 and 2.1.15 (b)) of the Radiocommunications Determination and Appendix A, ref 8 and 15).

The activities in relation to issuing PTS licences for operating a station in Public Mobile Telecommunication Service (PMTS) Class B and Class C are reflected by the ACMA's consideration of an application under section 99 of the Radiocommunications Act. If applicants do not have the coordination work for apparatus-licensed stations performed by accredited persons, there is considerable work for the ACMA to coordinate the station with other licences. The charge for a PMTS Class B licence reflects the required staffing effort, which has been reassessed based on the current underlying business processes using the ABC approach applied against the ACMA standard hourly rate.

- **Non-assigned licences** (see Schedule 1, Part 2, Table 1 (item 2.1.17) of the Radiocommunications Determination and Appendix A, ref 17).

A non-assigned apparatus licence means an apparatus licence that does not specify the frequency on which, or frequency range within which, a radiocommunications device authorised by the licence may operate (the permitted frequencies are instead specified in a separate legislative instrument).

- **Area-wide licences and area-wide receive licences** (see Schedule 1, Part 2, Table 1 (items 2.1.18–2.1.22) and Appendix A, ref 18–22) for issuing area-wide licences and (see Schedule 1, Part 2, Table 2 (items 2.2.7–2.2.8) of the Radiocommunications Determination and Appendix A, ref 29–30 for varying area-wide licences).

The area-wide licence (AWL) type is a transmitter licence type introduced in response to changes in technology and requests from spectrum users for additional flexibility within the apparatus-licensing system. Currently, the charges associated with issuing and varying AWLs are categorised as:

- **FSS-only AWL:** an AWL that includes a condition that only authorises operating a fixed earth station.
- **Standard AWL:** an AWL that is not an FSS-only AWL.

The area-wide receive licence (AWRL) is a receiver licence type introduced to support AWLs. AWRLs authorise operating radiocommunications receivers.

In February 2024, we announced that we would open applications in March 2024 for both AWLs and AWRLs in the allocation process for apparatus licences in the 3.8 GHz band in metropolitan, regional, and rural areas. Accordingly, charges for the issuing of an AWRL were introduced. We also amended the charges for standard AWLs to facilitate consistent charges between AWRLs and AWLs.

Applicants for AWRLs pay a charge for the ACMA considering an application for an AWRL. If the application is contested as part of an 'application window' process, there will be an additional charge to cost recover the additional activities (assessing the application against applications made for a standard AWL or another AWRL) undertaken by the ACMA.

The issue and variation charges for the AWRL are the same as the charges for a standard AWL, as both licence types are substantially similar and the activities and associated costs of assessing applications are equivalent.

4.3.2 Other charges relating to apparatus licences (see Schedule 1, Part 2, Table 2, (items 2.2.1–2.2.11) of the Radiocommunications Determination and Appendix A, ref 23–33).

Almost all (98%) applications to the ACMA for issuing or varying an apparatus licence are accompanied by a frequency assignment certificate issued by an accredited person. Frequency assignment typically represents most of the work associated with considering a licence application. Of the licences that are still assigned by the ACMA, the overwhelming majority continue to be for charge-exempt clients.

Changes to some apparatus licence charges are set out in this CRIS, reflecting the reassessment of required staffing effort and underlying business processes using the ABC approach.

4.3.3 Charges for permits, certificates or exemptions (see Schedule 1 Part 3, tables 1–4) of the Radiocommunications Determination and Appendix A, ref 34–44).

a) International broadcasting certificate (see Schedule 1, Part 3, Table 1 (item 3.1.1) of the Radiocommunications Determination and Appendix A, ref 34).

The charge for considering an application for a provisional international broadcasting certificate made under section 131AE of the Radiocommunications Act.

b) Non-standard equipment (see Schedule 1, Part 3, Table 2 (item 3.2.1–3.2.3) of the Radiocommunications Determination and Appendix A, ref 35–37).

Permits for non-standard and unlabelled devices are issued under the Radiocommunications Equipment (General) Rules 2021 made by the ACMA under the Radiocommunications Act. The charges for these activities have been separated so the charges for first-time applications and subsequent applications under the same terms by the same applicant are different.

c) Applications under the Radiocommunications (Exemption) Determination 2024 (the Exemption Determination) or under section 193 of the Radiocommunications Act (see Schedule 1, Part 3, Table 3 (item 3.3.1–3.3.4) of the Radiocommunications Determination and Appendix A, ref 38–41).

Under section 302 of the Radiocommunications Act, the ACMA may determine exemptions in relation to equipment subject to a permanent ban. The Exemption Determination, made under section 302 of the Radiocommunications Act, provides that we may make a notifiable instrument naming a person for the purposes of section 9 and paragraph 11(m) of the Exemption Determination. A named person can, within the limitations of the Exemption Determination, possess, operate and/or supply banned equipment.

Under section 193 of the Radiocommunications Act, the ACMA may issue written permissions that can facilitate operational/open-air testing of banned equipment with Australian Police and prescribed organisations specified in Schedule 3 of the Radiocommunications Regulations 1993. These written permissions are generally only provided to a person in relation to whom a notifiable instrument under the Exemption Determination has been made.

There are charges relating to the ACMA considering an application for a notifiable instrument, or written permission, making a new notifiable instrument or written

permission in relation to a current or recent² notifiable or written permission holder without application.

d) Charges relating to amateur and marine radio examinations and certificates

- **Amateur radio**

- **Amateur radio qualifications** (see Schedule 1, Part 3, Table 4 (item 3.4.1) of the Radiocommunications Determination and Appendix A, ref 42).

The ACMA issues the following recognition certificates to suitably qualified candidates under the Radiocommunications (Amateur Stations) Class Licence 2023 (the Amateur Class Licence):

- ACMA recognition certificate (Advanced)
- ACMA recognition certificate (Foundation)
- ACMA recognition certificate (Standard).

Candidates who have successfully passed a recognised amateur radio examination or undertaken a Recognition of Prior Learning (RPL) assessment can apply to the ACMA for an ACMA recognition certificate. The certificate issued will correspond to the type of examination undertaken and to the existing 3 types of amateur radio qualifications – Foundation, Standard and Advanced.

- **Amateur radio RPL** (see Schedule 1, Part 3, Table 4 (item 3.4.2) of the Radiocommunications Determination and Appendix A, ref 43).

The ACMA has a process for RPL and determining whether someone is eligible to apply for an ACMA recognition certificate under the Amateur Class Licence.

Overseas qualified amateurs seeking to gain an Australian qualification must be eligible to apply for an ACMA recognition certificate. To be eligible, the overseas amateur can either pass an examination that they can sit for free with an accredited assessor, or apply for an exemption (which requires an RPL assessment by us).

An RPL assessment results in the ACMA deciding whether to exempt the applicant from having to sit a component or components of an amateur radio examination. If the applicant is exempted from all components of an amateur radio examination, the applicant can apply for an ACMA recognition certificate. If the applicant is not exempted from all components of an amateur radio examination, the applicant will need to obtain a satisfactory result in the examination components they are not exempted from with an accredited assessor before applying for an ACMA recognition certificate. Once an RPL assessment has been completed, there is no cost to apply for an ACMA recognition certificate, regardless of the RPL outcome.

RPL assessments are a time-intensive process that may involve detailed consideration of an applicant's qualifications, liaison with an overseas amateur radio regulator to ascertain equivalency, and an interview with the applicant. The charge is structured accordingly.

- **Marine radio** (see Schedule 1, Part 3, Table 4 (item 3.4.3) of the Radiocommunications Determination and Appendix A, ref 44).

Marine radio examinations are currently undertaken by a third party under ACMA approvals and delegations, complemented by a deed of agreement with the

² The holder of a previous instrument/permission within 3 months after the previous instrument has ceased to be in force.

Commonwealth. The deed includes provisions that any charges charged by the third party are to be charged on a cost-recovery basis.

While the ACMA does not intend to conduct examinations under this arrangement, if a situation arises where we are required to provide the maritime radio examination service, a charge is intended to apply.

4.3.4 Charges relating to spectrum licences (see Schedule 1, Part 5, Table 1 (item 5.1.1–5.1.2) of the Radiocommunications Determination and Appendix A, ref 45–46).

These charges relate to considering a request to vary a spectrum licence under section 72 of the Radiocommunications Act, and for processing registration of an assignment of all or part of a spectrum licence under section 86 of the Radiocommunications Act.

4.3.5 Charges relating to satellite filing and coordination (see Schedule 1, Part 6, Table 1 (item 6.1.1– 6.1.4) of the Radiocommunications Determination and Appendix A, ref 47–50).

The filing and coordination of satellite networks with the International Telecommunication Union (ITU) is one of the ACMA's spectrum management functions under the ACMA Act. These activities are being carried out in accordance with the [Australian procedures for the coordination and notification of satellite systems](#).

The time required to undertake a full assessment of applications for satellite filing varies considerably depending on the complexity of the application. For new satellite operators, rather than a fixed up-front charge based on the time to assess a complex application, the charge for an initial assessment and consultation is based on the time expected to undertake an initial assessment of a simple application (5 hours). This allows new satellite operators to assess whether to proceed further with the full assessment, which is charged at the hourly rate. Accordingly, the charges are essentially charged at an hourly rate based on a 2-stage pricing structure. This is consistent with how applications from existing satellite operators are charged with charges based on the hourly rate.

4.3.6 Charges relating to miscellaneous services/matters (see Schedule 1 Part 7, tables 1–5) of the Radiocommunications Determination and Appendix A, ref 51–74).

a) Duplicate documents (see Schedule 1, Part 7, Table 1 (item 7.1.1) of the Radiocommunications Determination and Appendix A, ref 51).

These activities (relating to charges for issuing duplicate documents, various radiofrequency assignment and licensing services provided by the ACMA, miscellaneous radiocommunications services, establishment and maintenance of credit accounts and callsigns) reflect the services requested by industry and the relevant staff effort required to deliver them.

b) General radiocommunications services (see Schedule 1, Part 7, Table 2 (item 7.2.1–7.2.4 and 7.2.7) of the Radiocommunications Determination and Appendix A, ref 52–55 and 58).

The provision of radiofrequency assignment and licensing services is charged at an hourly rate. The provision of services to trace the location of an emergency position-indicating radio beacon (EPIRB) is charged at the special hourly rate A, which is the same hourly rate for field operations and interference investigations.

c) Supply of an adjacent service listing or frequency scan report (see Schedule 1, Part 7, Table 2 (item 7.2.5 and 7.2.6) of the Radiocommunications Determination and Appendix A, ref 56–57).

d) Accreditation rules and accredited persons (see Schedule 1, Part 7, Table 3 (item 7.3.1 to 7.3.2) of the Radiocommunications Determination and Appendix A, ref 59–60).

The Radiocommunications Determination sets out 2 charges – one for applications for a General Licensing Accreditation and another for Specific Licensing Accreditation. The rules for assessing both sets of applications are set out under the Radiocommunications Accreditation (General) Rules 2021 (the Accreditation Rules).

e) Credit accounts (see Schedule 1, Part 7, Table 4 (item 7.4.1–7.4.5) of the Radiocommunications Determination and Appendix A, ref 61–65).

These are charges relating to the establishment and maintenance of a credit account, which is a facility provided by the ACMA to enable credit account holders to pay radiocommunications charges on credit terms.

4.3.7 Charges relating to call signs

Amateur radio call signs (see Schedule 1, Part 7, Table 5 (item 7.5.1–7.5.9) of the Radiocommunications Determination and Appendix A, ref 66–74).

Call signs are a unique combination of letters and numbers that must be used for all communications under the Amateur Class Licence. The call signs we issue conform with the requirements set out in Article 19 (Identification of stations) of the International Telecommunication Union’s Radio Regulations and our amateur call sign policy.

There are various types of call signs. Some are available only to operators who hold certain qualifications. There are also special call signs that can be issued for use in, for example, contests/competitions or certain Australian external territories.

When applying for a call sign, operators can choose to express a preference for a specific call sign(s) or apply to be issued with a next available call sign in the category for which they are applying. Operators who hold call signs with the prefix VK0 or VK9, special event call signs and contest call signs can apply to have their call sign reassigned to them before expiry. Operators can also apply to ‘transfer’ their call sign to another amateur operator. The charges are structured to reflect the amount of time it would take us to assess an application and assign, reassign (transfer) a call sign (see Schedule 1, Part 7, Table 5 to the Radiocommunications Determination).

The Amateur Class Licence includes a provision for the ACMA to issue a replacement call sign if exceptional circumstances exist. There is no charge for issuing replacement call signs.

4.3.8 Charges relating to Digital radio multiplex transmitter licensing activity (see sections 6 and 7, Fees under the Radiocommunications (Digital Radio Multiplex Transmitter Licence – Application Fee) Determination 2022) and Appendix A, ref 75 and 76).

Digital radio services are licensed, planned and operated under the provisions of the *Broadcasting Services Act 1992* and the Radiocommunications Act. The legislation sets the statutory basis for spectrum planning for digital radio, allocating digital radio multiplex transmitter (DRMT) licences and the access regime for multiplex capacity.

Unlike analog broadcasting, where each broadcaster has its own transmitter, in radio broadcasting using Digital Audio Broadcasting plus (DAB+) technology, individual broadcasters aggregate or multiplex their content onto one or more multiplex transmitters, using digital compression technology.

The foundation category 1 and category 2 DRMT licence application fees reflect the effort required to process and issue these licences.

4.4 Telecommunications-related charges

Telecommunications regulation, planning and licensing

4.4.1 Nominated carrier declaration charges (see Schedule 1, Part 1 (item 1.1) of the Telecommunications Determination and Appendix A, ref 77).

4.4.2 Telecommunications connection permits and facility installation permits (see Schedule 1, Part 7, (item 7.1); Schedule 1, Part 3 and 4 (items 3.1–3.2 and 4.1–4.3) of the Telecommunications Determination and Appendix A, ref 78, 82–83 and 84–86).

Costs incurred by the ACMA in regulating the telecommunications industry are largely recovered under the *Telecommunications (Carrier Licence Charges) Act 1997* through imposing an annual carrier licence charge. However, several services for the telecommunications industry are recovered through charges set out in the Telecommunications Determination.

These include applications for:

- a) **Connection permits:** Written statement under paragraph 408(5)(a) of the Telecommunications Act in relation to labelling certification (see Schedule 1, Part 7 (item 7.1) of the Telecommunications Determination and Appendix A, ref 78).
- b) **Facility installation permit, including those relating to a public inquiry** (see Schedule 1, Part 3 and 4, (items 3.1–3.2 and 4.1–4.3) of the Telecommunications Determination and Appendix A, ref 82–86).

4.4.3 Charges payable to declare, vary or revoke a protection zone (see Schedule 1, Part 5, (items 5.1–5.4) of the Telecommunications Determination and Appendix A, ref 87–90).

4.4.4 Charges related to submarine cabling protection or non-protection zone (see Schedule 1, Part 6 (items 6.1–6.6) of the Telecommunications Determination and Appendix A, ref 91–96).

4.4.5 Charges related to numbering activities (see Schedule 1, Part 2 (items 2.1–2.3) of the Telecommunications Determination and Appendix A, ref 79–81).

Since 2015, most number allocation and administrative services for Australian telephone numbers have been provided via the Numbering System. The Numbering System was built, and the ongoing allocation services are provided, under contract. Charges for certain numbering transactions in the Numbering System are imposed by the *Telecommunications Numbering Charges Act 1997*. The ACMA sets the amount of those charges and imposes other charges under the ACMA Act.

This CRIS relates to charges set by the Telecommunications Determination, made under section 60 of the ACMA Act, and includes charges for carriage service provider registrations, smartnumber account registrations and geographic number allocations.

The Telecommunications (Numbering Charges) (Allocation Charge) Determination 2025, made under the Telecommunications Numbering Charges Act, covers all other number allocation charges that are not required to comply with the Commonwealth Cost Recovery Policy and are considered a general taxation charge (see the Explanatory Memorandum to the Telecommunications Bill 1997).

4.4.6 Charges related to carrier licence application

The charge for a carrier licence is set out under the Telecommunications (Carrier Licence Charges) (Application) Determination 2022 (see Appendix A, ref 97).

4.5 Broadcasting-related charges

Broadcasting regulation, planning and licensing

4.5.1 Charges relating to broadcasting licences (see Schedule 1, Part 1, (table items 1–5) to the Broadcasting Determination and Appendix A, ref 98–102).

Allocating broadcasting licences

We allocate licences that authorise the provision of commercial, international and subscription broadcasting services, and datacasting services. The charges for these services are separate from the annual Commercial Broadcasting Tax established under the *Commercial Broadcasting (Tax) Act 2017*.

The administrative activities involve issuing international broadcasting licences, datacasting licences, subscription television broadcasting licences and commercial broadcasting licences under the Broadcasting Services Act.

Allocating community radio broadcasting licences

These activities include allocating, renewing and transferring long-term community broadcasting licences and allocating temporary community radio broadcasting licences under Parts 6 and 6A of the Broadcasting Services Act. The licensing arrangements for community broadcasting services aim to enhance the delivery of information and entertainment to local communities across Australia. Imposing a charge for these activities would act as a disincentive to provide an important service by the community broadcasting sector, which operates on a non-profit basis and is heavily reliant on volunteers. Therefore, we have formed the view that these activities should be funded from appropriation and are not cost-recovery activities.

4.5.2 Charges related to provision of opinions, industry monitoring and compliance activities (see Schedule 1, Part 2, (table items 1–2) to the Broadcasting Determination and Appendix A, ref 103–104).

The provision of opinions by the ACMA under sections 21 and 74 of the Broadcasting Services Act are subject to cost-recovery charges. Opinions given under section 21 provide clarity to broadcasters about the category of broadcasting service their service falls within. Section 74 opinions advise an applicant whether a person is able to exercise control of a commercial television broadcasting licence, a commercial radio broadcasting licence, a satellite subscription television broadcasting licence, a newspaper or a company.

The procedural requirements for preparing and giving an opinion on application under sections 21 and 74 of the Broadcasting Services Act resulted in the same charge for both services in the past. There have been no applications for section 74 opinions in the past 5 years. The latest section 21 opinion was finalised in March 2019. As there is no reliable basis to establish the current actual steps required to prepare the opinion, we will invoice based on actual time taken to provide the service using the standard hourly rate.

4.5.3 Charges related to international broadcasting licence (see Schedule 1, Part 3 (table items 1–2) to the Broadcasting Determination and Appendix A, ref 105–106).

Considering an application for an international broadcasting licence under section 121FA of the Broadcasting Services Act continues to require the payment of an upfront deposit and further charges for processing the application. The charge for processing the application is based on the ACMA's standard hourly rate.

4.5.4 Broadcasting investigations activities

These activities relate to audiences and the general community, rather than just the individual who has initiated a complaint or an individual licensee. It may also not be possible to precisely identify the entity or group of entities that create the regulatory need for these activities to develop a charge. Therefore, it is considered appropriate that the activity continue to be funded through appropriation.

Other activities include monitoring compliance with licence conditions, standards and codes of practice. These include compliance with the anti-siphoning rules, internet industry codes of practice, children's television standards and disclosure standards. Currently these activities are not supported for cost-recovery.

5 New charge and changes to existing charges

As noted earlier, there are changes to nearly all fees due to the changes to the hourly rates. These changes will be implemented through amendments to the relevant determinations made under section 60 of the ACMA Act.

5.1 New radiocommunications charge

5.1.1 Radiodetermination (RNSS repeater system) licences (see Schedule 1, Part 2, Table 1 (item 2.1.11) of the Radiocommunications Determination)

On 19 June 2024, we [announced](#) that we expect to implement long-term licensing arrangements for RNSS repeaters from mid-2025 after considering consultation feedback. This included charges to issue and renew a radiodetermination licence that authorises the operation of RNSS repeaters.

RNSS generally describes any satellite constellation (such as the Global Positioning System (GPS)) that provides positioning, navigation and timing services. RNSS repeaters re-transmit RNSS signals into areas with poor-to-no reception of those signals.

The charge for an initial assessment is based on the time expected to undertake a similar assessment for the kinds of fixed licences under item 2.1.11 and a radiodetermination licence where there is no frequency assignment certificate for the application. Although RNSS repeaters have been charged under assigned scientific licences on a short-term basis, the new charge provides for a long-term mechanism for RNSS repeaters to be charged under a subtype of the radiodetermination licence.

Since a charge on this basis has not been previously applied, we consider the charge to be consistent with the expected amount of time to consider an application for an RNSS repeater system licence while also accounting for the varying complexities for each application.

Taking into account the change to the ACMA's standard hourly rate from \$226 to \$239, a \$510 cost-recovery charge applies for consideration of an application for an RNSS repeater system licence.

Table 3: New charge

No.	Charge type	Description	Estimated time taken by ACMA staff to provide service	Charge	Appendix A ref
1.	Apparatus licences – assigned licences	Considering an application under section 99 of the Radiocommunications Act for the issue (if applicable) of a radiodetermination licence (RNSS repeater system), where the application is not accompanied by a frequency assigned certificate issued by an accredited person	128 minutes	\$510 per licence	11

5.2 Changes to existing radiocommunications charges

There are also changes to some of the existing radiocommunications charges relating to apparatus licences, as shown in Table 4. The comprehensive review undertaken by the ACMA to assess the requirements of each of its current activities has resulted in a revision in the underlying business processes and corresponding ACMA staffing effort required to provide these services.

Table 4: Increase to existing radiocommunications determination charges in addition to the hourly rate changes

No	Charge type	Current description	Previous charge	New charge	Reason/notes	Appendix A reference
1	Assigned licences	<p>Considering each frequency assignment requested in an application under section 99 of the Radiocommunications Act for the issue of any of the following licences, where the application is accompanied by a frequency assignment certificate issued by an accredited person:</p> <ul style="list-style-type: none"> (a) earth licence (fixed earth station) (b) earth licence (mobile earth station) (c) space licence (d) space receive licence. <p>Note: All frequency assignments associated with transmitter licences, and all frequency assignments associated with receiver licences, are chargeable.</p>	\$102 per spectrum access	\$120 per spectrum access	The increase reflects the change in the ACMA's standard hourly rate from \$226 to \$239, and a slight increase in the processing time for assessing applications, resulting in an overall increase of 18%	3
2	Assigned licences	<p>Considering an application under section 99 of the Radiocommunications Act for the issue of any of the following licences and issuing it (if applicable), where the application is not accompanied by a frequency assignment certificate issued by an accredited person:</p>	\$264 per spectrum access	\$291 per spectrum access	The increase reflects the change in the ACMA's standard hourly rate from \$226 to \$239, and a slight increase in the processing time for assessing applications, resulting in an overall increase of 10%	7

No	Charge type	Current description	Previous charge	New charge	Reason/notes	Appendix A reference
		(a) space licence (b) space receive licence.				
3	Assigned licences	<p>Considering each frequency assignment requested in an application under section 99 of the Radiocommunications Act for the issue of any of the following licences, where the application is not accompanied by a frequency assignment certificate issued by an accredited person:</p> <p>(a) earth licence (fixed earth station) (b) earth licence (mobile earth station) (c) earth receive licence.</p>	\$546 per spectrum access	\$590 per spectrum access	The increase reflects the change in the ACMA's standard hourly rate from \$226 to \$239, and a slight increase in the processing time for assessing applications, resulting in an overall increase of 8%	16

No	Charge type	Current description	Previous charge	New charge	Reason/notes	Appendix A reference
4	Assigned licences	<p>Considering an application to vary, under section 111 of the Radiocommunications Act, the conditions of any of the following licences, and varying it (if applicable), where the application is accompanied by a frequency assignment certificate issued by an accredited person:</p> <p>(a) earth licence (fixed earth station)</p> <p>(b) earth licence (mobile earth station)</p> <p>(c) space licence</p> <p>(d) space receive licence.</p>	\$102 for each frequency assignment or paired frequency assignment to which the application relates	\$120 for each frequency assignment or paired frequency assignment to which the application relates	The increase reflects the change in the ACMA's standard hourly rate from \$226 to \$239, and a slight increase in the processing time for assessing applications, resulting in an overall increase of 18%	27

6 Risk assessment

We have carried out a risk assessment for this cost-recovery arrangement during the review process, based on the assessment of the criteria in the Department of Finance Charging Risk Assessment.

The overall rating given to this cost-recovery arrangement is medium. There are no complexities involved with this charging mechanism as the charges for the services will continue to be charged using the current methodology as outlined in:

- **section 3:** Costs of performing ACMA activities
- **section 4.2:** Design of cost-recovery charges for this CRIS.

Table 5: Charging risk assessment

Assessment component	Implementation risk	Risk rating
What is the expected percentage change in total annual revenue after the proposed changes?	The expected percentage change in the total annual revenue after the proposed changes is 6%.	Low
What is the expected change in total annual revenue after the proposed changes?	The expected change in total annual revenue after the proposed changes is \$0.13 million.	Low
What is the highest percentage increase in price a payer [†] may experience?	The highest percentage increase in price a payer may experience is 18% (see Ref 3 and 27, Appendix A). The increase reflects the change in the ACMA's standard hourly rate, and a slight increase in the processing time for assessing applications, resulting in an overall increase of 18%.	High
What type of charges are changing?	Fees only	Low
What does the revised proposal involve?	There is a change in the level of existing regulatory charges only	Low
Does the revision require legislative changes?	Existing legislative mechanisms are in place	Low
What will the impact on payers be?	The ACMA has provided industry visibility of increased costs through consultation on this Fees CRIS and arrangements for charges and taxes for long term licensing of RNSS repeaters. No issues were raised on the quantum of increase to the hourly rate or to the proposed new charges for RNSS repeater system licences.	Low

Does the proposal involve working with other Commonwealth, State/Territory and/or local government entities?	No engagement with other Commonwealth, state/territory and/or local government entities is required.	Low
What consultation has occurred with payers and other stakeholders about the proposed charges?	Consulted - no issues raised.	Low
Overall CRA rating:		Medium

7 Stakeholder engagement

To maintain active engagement with stakeholders, we published a consultation paper and draft CRIS on our website from 4 April to 2 May 2025 and sought comments from telecommunications carriers and CSPs, broadcasters, radiocommunications licensees and industry associations. No submissions were received as part of the consultation process.

Between 19 June and 17 July 2024, we [consulted](#) on proposed charges and taxes to enable long-term licensing of RNSS repeaters. The consultation received 7 public submissions from industry representative bodies, toll-road and mobile network operations, and aerospace and railway entities.

Submitters supported the proposal to licence RNSS repeaters using the radiodetermination licence type and with economical charges to encourage deployment of the devices. Although \$482 was specified as the proposed issue charge at the time of the consultation, the revised charge is \$510 to correspond with the new standard hourly rate.

8 Financial estimates

Table 6 provides the estimated cost-recovery revenue and expenses for the financial years 2025–26 to 2028–29.

Table 6: Estimated cost-recovery revenue and expenses

Charge item	Budget year 2025–26* (\$million)	Forward estimate 1 2026–27 (\$million)	Forward estimate 2 2027–28 (\$million)	Forward estimate 3 2028–29 (\$million)
Radiocommunications charges	1.89	1.90	1.90	1.90
Telecommunications charges	0.25	0.25	0.25	0.25
Broadcasting charges	0.01	0.01	0.01	0.01
Total revenue	2.16	2.16	2.16	2.16
Total expenses	2.16	2.16	2.16	2.16
Balance	0.00	0.00	0.00	0.00

* Estimated 2025–26 financial year costs includes changes to the hourly rates and increases to charges identified in tables 3 and 4.

Note - Sums may not add due to rounding

8.1 Financial performance

Table 7 provides historical revenue and expenses for the past 5 financial years.

Table 7: Actual cost-recovery revenue and expenses

Charge item	2020–21 (\$million)	2021–22 (\$million)	2022–23 (\$million)	2023–24 (\$million)	2024–25* (\$million)
Radiocommunications charges	3.43	3.18	2.76	2.09	1.78
Telecommunications charges	0.18	0.12	0.19	0.22	0.24
Broadcasting charges	0.04	0.03	0.02	0.01	0.01
Total revenue	3.65	3.33	2.97	2.32	2.03
Total expenses	3.65	3.33	2.97	2.32	2.03
Balance	0.00	0.00	0.00	0.00	0.00

* The 2024–25 financial year amounts are based on year-to-date actuals to 30 April 2025 and estimates until 30 June 2025.

Note – Sums may not add due to rounding

Revenue and expenses for 2024–25, particularly in relation to radiocommunications charges, reflects the decrease in processing applications associated with radiocommunications frequency assignment certificates electronically and considering applications to vary assigned licences.

The apparatus licences³ that were issued, renewed or varied that generated the most revenue were:

- fixed licences (point-to-point station)
- land mobile systems greater than 30 MHz
- PMTS Class B
- ambulatory system – land mobile
- area-wide licences.

Most of the broadcasting revenue is related to the renewal of commercial radio and television broadcasting service licences. Telecommunications charges remained relatively stable. Refer to Appendix A for information on the various ACMA charge types.

8.2 Non-financial performance

We are responsible for regulating broadcasting, radiocommunications, telecommunications and some online content. Our key performance indicators and associated performance objectives for our deliverables are:

- **Support an efficient and reliable communications infrastructure**
 - The ACMA's spectrum planning, allocation and licensing activity meets the needs of the communications industry.
 - The ACMA's contribution to the international spectrum framework supports the needs of the Australian communications industry.
 - The ACMA's activities contribute to telecommunications infrastructure providers having confidence that they are appropriately authorised and enabled to provide communication services.
- **Build consumer trust in the use of communications content and services**
 - The ACMA's activities contribute to Australian consumers having confidence in the content and services available to them.
 - The ACMA's activities enable Australian consumers access to diverse media content and services.

The ACMA's key deliverables for the 2025–26 financial year are expected to be published on our website through the 2025–26 corporate plan.

³ See the [Radiocommunications Determination](#) for definitions of these terms.

9 Key forward dates and events

The key forward events and dates for this CRIS update are set out in Table 8.

Table 8: Key forward dates and events

Key events	Indicative date
Next scheduled update of financial outcomes	July 2026
Next scheduled portfolio charging review	2025–26
