Ref: Changes to CB radio arrangements 2025

Dear ACMA,

I support the proposed 2025 changes for CB Radio, particularly the addition of FM to the HF band.

Regards further potential changes in the future I would vote to keep the 3 emergency channels, whilst I suspect their use is minimal, I believe it's wise to keep them. Changes in this area could lead to confusion and a potential emergency call getting missed.

I don't know of anyone in my area (Adelaide) using the UHF CB radio band for data or telemetry and in my travels around Australia I've never heard any activity.

Thanks and Regards

Ben Jenkins
