

ACMA CHANGES TO CB RADIO ARRANGEMENT CONSULTATION PAPER JUNE 2025

Dated 6th June, 2025

Frequency modulation used in the HF band

I agree totally with all the proposed changes of the above.

Initiating contact on the HF channels 11+18+UHF channel 11

I agree totally with all the proposed changes of the above.

Prohibition on certain on air contact

I agree totally on all the proposed changes of the above.

Directions given by inspectors plus other persons

I agree totally on all the proposed changes of the above.

A CB radio connected to telecommunication network

I agree totally with your proposal for the above

Use of voice over internet protocol (voip) applications

I agree totally with your proposal for the above.

Formatting and other drafting changes

I agree totally with the proposal for the above.

Emergency communications on HF channel 9 and UHF channel 5 and 35

I believe the above emergency channels should be retained as they are because in
A natural disaster there is a possibility of losing all other forms of communications
(mobile phone service/landlines).

Chanel arrangements for data transmissions (Telephony plus Telecommand)

I believe channels 22/23/61/62 plus 63 should be narrow band 12.5KHz and used
For the above mentioned.

Regards

Karen Baker
