

# ACMA Changes to Frequency Band Plans

Telstra Submission

20 June 2025

Telstra welcomes the opportunity to comment on the ACMA's "Proposed changes to frequency band plans" (the **consultation**).

### **Telstra's view on the ACMA's consultation**

We note that:

1. The ACMA is proposing that the following frequency band plans be amended under this consultation, namely the Radiocommunications (Mobile-Satellite Service) (1980–2010 MHz and 2170–2200 MHz) Frequency Band Plan 2022 (the **MSS Frequency Band Plan**) and the Radiocommunications (Television Outside Broadcasting) (2010–2110 MHz and 2200–2300 MHz) Frequency Band Plan 2022 (the **TOB Frequency Band Plan**).
2. The driving factor behind the need for amendments of the MSS and TOB Frequency Band Plans is the need to reflect the new Low Interference Potential Devices (LIPD) class licence.

**Overall, Telstra has no objections to the proposed amendments to the MSS and TOB Frequency Band Plans.**
