

**Sennheiser response to ACMA's consultation:  
Remaking the low interference potential devices class licence (March 2025)**

Sennheiser electronic SE & Co. KG welcomes the opportunity to respond to the consultation on Remaking the low interference potential devices class licence. Specifically, our response addresses the proposals in relation to Wireless Multichannel Audio System (WMAS) technologies for wireless microphones. We would like to thank ACMA's consideration and regulatory action to allow for the use of WMAS technologies.

**About Sennheiser electronic SE & Co. KG**

At Sennheiser, we aim to shape the future of audio by creating unique sound experiences for our customers. As a third-generation family-run business, we are equally proud of our over 75-year history and past accomplishments and innovations in the world of audio and of our ambition to shape its future.

Sennheiser electronic SE & Co. KG, headquartered in Wedemark (Germany), is the leading European manufacturer for professional audio solutions such as microphones, meeting solutions, streaming technologies, and monitoring systems. The business with consumer devices such as headphones, soundbars and speech-enhanced hearables is operated by Sonova Holding AG under the license of Sennheiser.

**Comments**

Sennheiser fully supports ACMA's proposal to update the LIPD class licence with a new item that authorises WMAS within the 520-694 MHz frequency range, and the conditions set out in the draft Radiocommunications (Low Interference Potential Devices) Class Licence 2025. In addition, Sennheiser supports the updated reference to EN 30 422-1 as the appropriate reference standard.
