What have you got planned for your major project?

Our major project will be focused on diversity and inclusion. We'll be exploring initiatives and strategies, particularly around gender equality, LGBTQI+ inclusion, cultural diversity and Indigenous inclusion, and supporting people with disability to actively create a more inclusive culture that embraces and values different experiences and perspectives. There's obviously a lot of unpack and cover, and always more we can do as an agency – but ultimately, it'll be about creating a meaningful framework that reflects us as an organisation and the community we serve.
