

**Australian Radiofrequency Spectrum Plan (2025 Update) 2021**  
**Decision under subsection 10(10)**

Pursuant to clause 10(10) of the *Australian Radiofrequency Spectrum Plan (2025 Update) 2021* (Spectrum Plan), I, Chris Worley, delegate of the Australian Communications and Media Authority, being satisfied that the use of the fixed-satellite service (specifically earth stations communicating with non-geostationary space stations in the fixed-satellite service (Earth-to-space)) within the frequency ranges 92–94 GHz, 94.1–95 GHz, 95–100 GHz, 102–109.5 GHz and 111.8–114.25 GHz:

- (i) Is an unspecified service in respect of the frequency bands 92–94 GHz, 94.1–95 GHz, 95–100 GHz, 102–109.5 GHz and 111.8–114.25 GHz
- (ii) Is unlikely to cause harmful interference to another service if:
  - a. earth stations are located within circles of 2 kilometres radius with the centre of the circles at  $-33.785073^{\circ}$ ,  $151.131214^{\circ}$  and  $-31.864147^{\circ}$ ,  $115.895866^{\circ}$  where the coordinates are with reference to **GDA94** where **GDA94** means the geodetic datum designated as the “Geocentric Datum of Australia (GDA)”, gazetted in the Commonwealth of Australia *Gazette* No. GN 35, on 6 September 1995, as existing on that date.

approve the 92–94 GHz, 94.1–95 GHz, 95–100 GHz, 102–109.5 GHz and 111.8–114.25 GHz frequency bands for use by the fixed-satellite service (specifically earth station transmitters communicating with non-geostationary space stations in the fixed-satellite service (Earth-to-space) at the above-mentioned locations.

Dated: 15 December 2025
