16. A summary of the preliminary and preferred views, as well as key differences, follows:

Preliminary view	Preferred view	Key changes
[REDACTED]	[REDACTED]	[REDACTED]
WA WBB and FWA ESLs should be renewed, subject to further information about Telstra's use of the 2.3 GHz band [REDACTED]	WA WBB and FWA ESLs should be renewed	It is too early, and there is not enough information, to form a view as to whether Telstra's use of recently acquired 2.3 GHz spectrum in remote areas is compatible with the competition outcomes in our public interest framework or in the policy objectives specified in the MPS. We intend to provide an update on our preferred view for this spectrum in July 2027, one year prior to the opening of the renewal application period for the 2.3 GHz band. [REDACTED]
